Resonate to Co-Create: the Positive Leadership System

Unlock the power of Positive Leadership to drive your team's performance, creativity and innovation in the workplace.

Positive Leadership is where positive psychology and appreciative inquiry meet best practices in transformational leadership. Positive psychology is a relatively new branch of psychology that focuses on making people happier by increasing positive emotions and decreasing negative emotions.

Appreciative inquiry is a model that seeks to engage stakeholders in self-determined change. Best practices in transformational leadership include modeling the way, inspiring a shared vision, challenging the process, enabling others to act, and encouraging the heart.

These foundations have been integrated into the DREAM MK + and ME.WE.US + Leadership Systems comprising the core of this workshop series.

This workshop series is designed for mid-managers and higher (and those aspiring to be). This workshop series is inspired by the work and research of best selling authors Barbara Fredrickson, Richard Boyatzis, Annie McKee, James Kouzes, Barry Posner and Peter Senge amongst others. Benefits include less stress in the workplace, lower absenteeism and turnover, increased productivity and effectiveness, and happier employees and customers.

Sample of Past Clients: CFB Suffield, St. Gobin, Medicine Hat College, ProjectWorld Business Analyst World, Buildex, Northern Health BC, University of Calgary, Bard College.
